

G R E E N S Q A

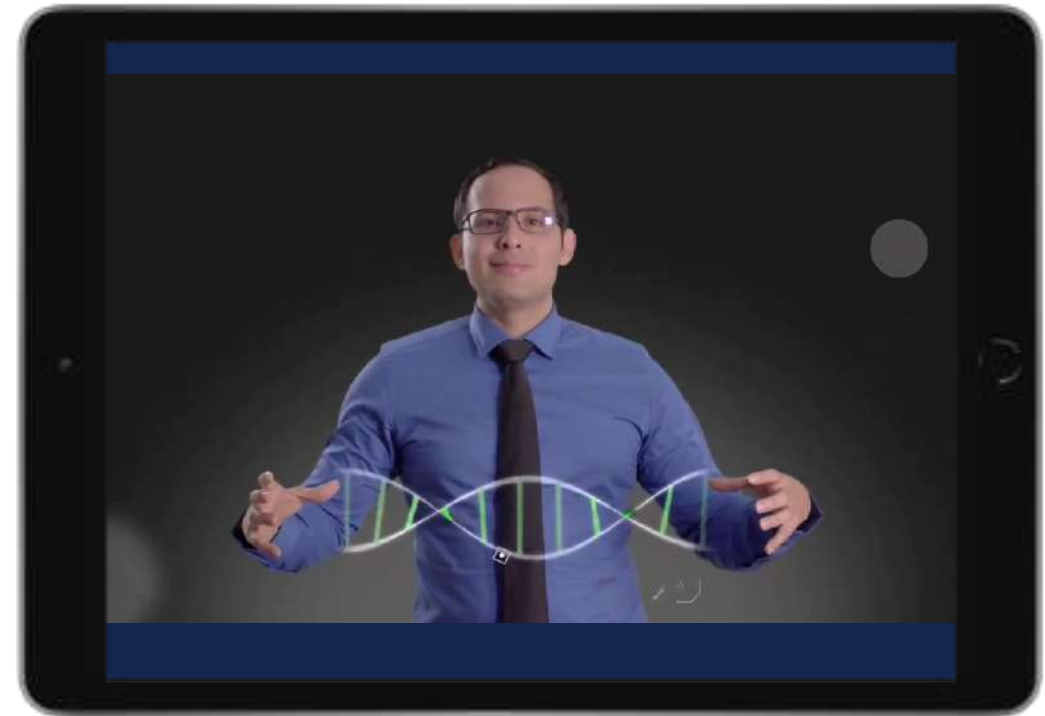

Unleashing the technological reality
Of your dreams, **hand-in-hand!**

Our story

Established in 2003, **GreenSQA** is one of the preferred software quality assurance and testing partner across the country.

Well known for our capabilities of incorporating technology to our services and persistent focus on customer business goals and satisfaction. We had been appraised as a CMMI level 3 IT Services Organization, ISO 9001 and ISO 27001, **demonstrating that our processes and quality are standardized and aligned with globally accepted practices.**

Throughout our journey, we have served clients from different industries, helping them to achieve a better QA's ROI and, above all, to achieve their business objectives.

We are helping to **creating a better world**
with the greatest quality and productivity

We make dreams come true with the help of
research and innovation in Software quality
assurance, testing and monitoring.

Quality Partner

Business Assurance

Our industry and technology knowledge helps our clients achieve their business goals.

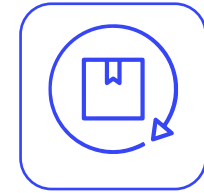

Outcome Based Testing

We provide proven methodology that guarantees cost reduction through quality improvement.

QA/QC/CI Solutions

We focus on results delivery through end-to-end management of testing solution.

Delivery model

Near-Shore, Project based and Managed Crowd Testing options.

■ Expertise ■

National & International

Our clients say

” Our consolidation as a provider of IT solutions worldwide, specifically within the CGIAR (Consultative Group for International Agricultural Research), was successful thanks to the joint work with GreenSQA in testing and quality assurance during the software development process; was classified as a success story for institutions related to CIAT in Rome and the United States.”

Solutions

Our Software Testing Services include

■ Services ■

Agile testing

We implement software testing that follows the agile principles of software development engaging members of a multifunctional team resulting in a project evolution that follows business needs and flows at a sustainable and continuous pace.

Robotic Process Automation (RPA)

We provide automation for repetitive tasks and procedures using software "robots" to perform actions that a human user executes in a system business process, without human intervention.

Mobile testing

We provide tailored solutions for each application, combining operating systems, browsers, emulators, simulators, and a wide range of devices.

Analytics

We provide specialized services to transform data from production environments into information with meaning that allows an understanding of the performance and satisfaction of business processes that operate on web platforms.

Cloud testing

We can deploy our tools on Cloud Service Models, such as: PAAS (Platform As A Service) or operate complete solutions such as TAAS (Testing As A Service), SAAS (Software As A Service), Serverless Computing and Containers.

Microservices

We provide architecture based on Microservices that are characterized by their Agility and flexibility leading to the implementation of cutting-Edge technological practices such as continuous delivery (DevSecOps).

CBM

Continuous
Business
Monitoring

We help our clients to **prepare, anticipate, and receive early online alerts** to guarantee availability, avoid failures, protect their workflows and above everything else **we help them to increase their conversion rates!**

¿HOW DO GREEN SQA CBM WORKS?

Our automated system allows our Bots to monitor and warn about errors in the APIs, Sites and Web services.

Scope definition

- Functional scope for testing business processes
- Success criteria and alert rules
- Bots maintenance SLAs

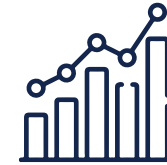

Calibration period

- Schedules to run monitoring jobs
- Robots to run business processes
- Process timing criteria to monitor performance
- Alerting rules configuration

Delivery and maintenance

- Service delivery
- Digital channels change requests
- Bots maiteinance

Reports and analytics

- Descriptive analysis
- Custom dashboards.
- On demand anlysis
- Data driven decisions
- Predictive analysis

ANALYTICS DASHBOARD

You will be able to analyze in a personalized way, adjusting the visualization to your needs to optimize decision making.

INTAKE POINTS METRIC

We collect the relevant data of your business, highlighted according to your needs.

MONITORING FREQUENCY

Each company has its own seasonality, we adapt the monitoring frequency based on your needs.

FAILURES NOTIFICATION

You will have a 24/7 alert system, of the signs that you consider vital on your digital channels, sent by the communication channel of your choice (chat, mail, sms, among others).

DATA STORAGE

Key information will always be available to you, with selective data histories.

MONITORING ROBOTS

We build robots at maximum speed that validate autonomously, generating available time for you.

ANS- ROBOTS UPDATE

We synchronize the robots in accordance with the changes in your digital channels.

REPORTS

Generate reports when required, to share them with your business leaders.

PRESCRIPTIVE ANALYTICS

You will have AI-leveraged capabilities to find behavior patterns and predict future failures.
